Covid data visualisation for Canada using Pingouin

Rubaba Mammadova [*]

August 1, 2020

My project focuses on visualisation of covid data for Canada via third-party Python package Pingouin.

Figure 1: nature

As you can see in the figure **??**, the function grows near 0. Also, in the page **??** is the same example. We have now added a title, author and date to our first LaTeX document!

Figure 2: sun

As you can see in the figure **??**, the function grows near 0. Also, in the page **??** is the same example.
